

A city like Miami deserves an urban center. In order to create one, Architectum and the Miami Chapter of the American Institute of Architects have joined, inviting the world's architects to propose the best Civic Center for Miami.

Bayfront Park is a strategic center for the city: connected to the sea, the Port of Miami, Biscayne Boulevard, Brickell Avenue, Bayfront Park Amphitheater, Bayside Shopping Mall and the American Airlines Arena. This is the ideal site to propose an urban center containing Miami's City Hall, Cathedral, Fashion Houses and housing projects, which would generate a complex and attractive public space for all the Miami citizens.
